Ruslan Kutliakhmetov

Senior Frontend Developer, React / TypeScript / Next.js

Tyumen, Russia | Remote | Full-time
Telegram: @ko22009 | kosid2@gmail.com
GitHub: github.com/ko22009 | English: B1

Profile

Over seven years of commercial web development experience, including FinTech and enterprise systems. I specialize in React, TypeScript, frontend architecture, complex user flows and performance. I have built a UI kit for adjacent teams, separated microfrontends, agreed on APIs and reviewed code. Experienced working on Moscow time. Former tech lead for four frontend developers. In project work, I handle the full lifecycle from architecture and implementation to release and support, including CRM systems, business process automation, electronic document management, 1C and payment integrations. I use Claude Code and ChatGPT daily and review the resulting changes.

Experience

Sravni.ru - Senior Frontend Developer

July 2024 - June 2026 | Financial marketplace serving millions of users

- Split the insurance frontend monolith into five Webpack Module Federation modules, enabling independent releases and reducing CI build time by approximately threefold.
- Rebuilt a multi-step insurance application form using React Hook Form and TypeScript, including validation, document uploads and prefilling with RTK Query and LocalStorage. Purchase conversion increased by approximately 15%.
- Profiled and fixed subscription memory leaks, cascading re-renders and unnecessary reflows in lists of up to 10,000 items. Core Web Vitals improved by 25% on average.
- Implemented insurance quote and notification updates using SSE and WebSocket. Maintained FSD conventions, coordinated API formats and reviewed code.

Digital Economy League - Senior Frontend Developer

January 2023 - July 2024 | Government and enterprise systems

- Led four frontend developers, designed architecture, broke down tasks, coordinated APIs with backend developers and reviewed code.
- Designed an RBAC frontend module with dynamic role matrices for thousands of employees.
- Migrated projects to Nx, configured build caching and eliminated circular package dependencies. CI/CD pipelines ran twice as fast.
- Built a network topology graph with over 200 nodes using React Flow and a geospatial map for over 1,000 objects with WebSocket updates.

Selecty - Senior Frontend Developer

April - November 2022 | Otkritie Bank investment portal

- Built over 30 reusable React and TypeScript components for an internal UI kit and configured package publishing for three adjacent teams.
- Developed financial analytics with interactive charts. Reduced the initial bundle by approximately 30%, improving initial load time.

BARS Group - Frontend Developer

September 2020 - February 2022 | Healthcare information system

- Developed medical reporting interfaces and printable PDF and Excel forms. Implemented the frontend for online cash registers and payment gateway integrations.
- Migrated the electronic queue to WebSocket, optimized tables and fixed two client-side input handling vulnerabilities.

tpthub - Frontend Developer

August 2019 - September 2020 | Transport logistics SaaS

- Built drag-and-drop time slot scheduling and core client interfaces with Vue.js. The platform was used in operations serving EXPO 2020 Dubai.

Skills

- Frontend: JavaScript, TypeScript, React, Next.js, Vue.js, HTML5, CSS3, Tailwind CSS, MUI.
- State and APIs: Redux Toolkit, RTK Query, Zustand, MobX, React Hook Form, REST API, WebSocket, SSE, GraphQL.
- Architecture and performance: FSD, Module Federation, single-spa, Nx, Webpack, Vite, UI kits, DevTools profiling, rendering optimization, Core Web Vitals, code splitting.
- Quality and delivery: Jest, React Testing Library, Vitest, Playwright, Git, GitLab CI/CD, Docker, Linux.
- Full-stack project work: PHP/Laravel, PostgreSQL, MySQL, Node.js.

Projects

sharik86.ru - Client online store

Rebuilt a WordPress store with Next.js and PostgreSQL in three weeks using Claude Code. Implemented a responsive storefront, Kanban admin panel and notifications via MAX and email. Responsible for architecture, server-side logic, data, SEO and release.

ArtLogistic - Order and delivery CRM

Upgraded Laravel from 5.5 to 13 and PHP from 7.3 to 8.4 in five days, and migrated the server. Automated business processes and electronic document workflows, protected orders against loss during 1C failures, fixed vulnerabilities and added a team orders page for supervisors.

AI Practice

I use Claude Code and ChatGPT daily for research, development, debugging and review. In a product team, I used AI for boilerplate code and unit tests; in project work, I use it throughout implementation. I manually review architecture, typing, security and critical user flows.

Mentoring and Education

Frontend mentor for the Sapphire team in Habr Career's Pet Project Battle, 2023. The team won and launched Collabry.

South Ural State University, Chelyabinsk

- Master's degree in Business Informatics, 2018.
- Bachelor's degree in Applied Informatics, 2016.
- Professional retraining: Translator in Professional Communication, 2016.
